

Practice Profile: Education

Pace has a dedicated education consultancy team with a proven track record in delivering practical solutions for BSF, Academy, PCP and refurbishment projects – competitively achieving BB93 and Local Authority compliance.

BSF

Bournemouth & Poole BSF – BSF Project Office / Local Authority

Pace has undertaken a series of acoustic site surveys on behalf of the Bournemouth & Poole BSF Project Office. Surveying nine sites in total, Pace assessed environmental noise control requirements, natural ventilation requirements and background noise levels, producing a comprehensive report for inclusion in the tender briefs for interested bidders.

Middlesbrough BSF – Willmott Dixon Construction & Shepherd Construction

Pace was commissioned to provide advice on the entire £100 million scheme. Comprising eight school projects across two sites, Pace delivered a ‘concept to completion’ suite of consultancy services, including a free design review that helped sharpen up the bid at tender stage.

Academies

Willmott Dixon Construction – Hope Academy, Oxford Academy, Skinners Academy

As part of a nationwide partnership agreement, Pace has been retained on a number of Willmott Dixon Academy projects, taking the developments through from free bid reviews at tender stage to full acoustic design briefs and on-site sound testing.

Galliford Try Construction – Wren Academy, Harris Academy

Galliford Try Construction has commissioned Pace to undertake full acoustic design briefs – from detailed design to on-site sound testing – to ensure these flagship Academy projects are delivered to BB93 standards.

Areas of expertise include:

- Detailed Design
- Testing & Certification
- Refurbishment
- Guidance & Advice
